

## FEATURES

- O-Ring Mount
- -40°C to +125°C Operating Temperature
- Up to ±0.1% TYP. Pressure Non-Linearity
- Solid State Reliability
- Constant Current

# **APPLICATIONS**

- Medical Instruments
- Process Control
- Fresh & Waste Water Measurements
- Refrigeration/Compressors
- Pressure Transmitters
- Hydraulic Controls

# TEI-19 Compensated

# **SPECIFICATIONS**

- 316L SS Pressure Sensor
- 19mm Diameter Package
- 0 100mV Output
- Absolute and Gage
- Temperature Compensated

The TEI-19 compensated is a 19 mm small profile, media compatible, piezoresistive silicon pressure sensor packaged in a 316L stainless steel housing. It is designed for O-ring mounting and OEM applications where compatibility with corrosive media is required.

The sensing package utilizes silicone oil to transfer pressure from the 316L stainless steel diaphragm to the sensing element. A PCB is attached to the package that contains laser-trimmed resistors for temperature compensation and offset correction.

For a similar sensor with same outline dimensions and similar parameters, refer to the 154N Compensated pressure sensor.

	≥ 15 PSI	-40	-	+125	°C	9
Storage Temperature		-40	-	+125	°C	9

Media – Reference Port

LIQUIDS AND GASES COMPATIBLE WITH 316/316L ST STL

### Notes:

- 1. Measured at vacuum for absolute (A), ambient pressure for gage (G).
- 2. Best fit straight line.
- 3. Over the compensated temperature range with respect to 25°C.
- 4. Guarantees output/input ratiometricity.
- 5. Load resistance to reduce measurement errors due to output loading.
- 6. Between case and sensing element.
- 7. The maximum pressure that can be applied without changing the transducer's performance or accuracy.
- 8. The maximum pressure that can be applied to a transducer without rupture of either the sensing element or transducer.
- 9. Maximum temperature range for product with standard cable and connector is -20°C to +105°C.
- 10. Standard gage units are not recommended for vacuum applications. For vacuum applications below 1/2 atmosphere, consult factory.
- 11. Device marking: each part shall be identified with model number, pressure range, type ("A' for absolute or "G" for gage), lot number, serial number and date code.
- 12. Shipping/packaging requirements:
- The stainless-steel diaphragm is protected by a plastic cap. Each unit will be packaged individually in a plastic vial with anti-static foam. 13. Direct mechanical contact with diaphragm is prohibited. Diaphragm surface must remain free of defects (scratches, punctures, dents,
- fingerprints, etc) for device to operate properly. Caution is advised when handling parts with exposed diaphragms. Use protective cap whenever devices are not in use.
